

PRATIK LAL VISHWAKARMA

Software Test Engineer | Playwright with TypeScript

pratikv8070@gmail.com | 7004452960 | [linkedin.com/in/pratiklalv](https://www.linkedin.com/in/pratiklalv) | github.com/pratik-8070

SUMMARY

QA Automation Engineer with **2 years** of experience in **web, API, and mobile** automation, including hands-on experience with **B2B SaaS products**. Skilled in **Playwright, TypeScript, JavaScript, Appium, REST API testing, and CI/CD**, with experience building **automation frameworks from scratch** and achieving **95%** automation coverage. Experienced in **AI-assisted** test automation using **Claude, ChatGPT, and GitHub Copilot**.

WORK EXPERIENCE

Software Test Engineer | MelloUp, Bengaluru

Sep 2024 – Apr 2026

- **Built a Playwright (JavaScript/TypeScript) automation framework from scratch** using the **Page Object Model**, reaching **95% automation coverage** and reducing manual **regression testing** time by an estimated **60–70%**.
- Automated end-to-end **B2B SaaS** workflows — event tracking, attendee filtering, group creation, email campaigns, and lead engagement — enabling **faster, more reliable** releases.
- Developed functional, regression, smoke, and REST API test suites using Playwright and Postman, **catching defects earlier** in the release cycle and improving overall release quality.
- Applied **AI tools (Claude, ChatGPT, GitHub Copilot)** to accelerate test script authoring and debugging, shortening framework development time.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript
- Automation Tools: Playwright, Appium, WebdriverIO
- Mobile Automation: Android Studio, UiAutomator2, Appium Inspector, Android
- Emulator Framework Design: Page Object Model (POM), Fixtures, Custom Assertions,
- Locators CI/CD: GitHub, GitHub Actions
- Test Management & Reporting: JIRA, Allure Reports
- Testing Types: Functional, Regression, Smoke, Sanity, API, UI Testing
- AI Tools: Claude, ChatGPT, GitHub Copilot

AUTOMATION PROJECTS

Playwright Web & API Automation Framework (*Tech Stack: Playwright, JavaScript, TypeScript, POM, GitHub Actions*)

- Built a reusable Playwright automation framework using JavaScript/TypeScript.
- Automated UI and REST API test scenarios with reusable POM, fixtures, and assertions.
- Implemented reporting, parallel execution, retries, and GitHub Actions for test execution.

Android Mobile Automation Framework (*Tech Stack: Appium, WebdriverIO, TypeScript, UiAutomator2*)

- Built a native Android automation framework using Appium and WebdriverIO.
- Automated mobile UI interactions using Appium Inspector, UiAutomator2, and Android Emulator.
- Validated native Android screens using reusable locators and assertions.

EDUCATION

M.Sc — Kolhan University, Jharkhand
